A fun, relaxing, and beautiful Match 3 game with all of the power ups and abilities that you come to expect from Match 3 gaming! The story is okay at best, but still, the theme is fun.. Relaxing, colorful, and overall, a very pleasant match 3 type game which, in my opinion, is probably above average in this genre. One small quibble I have, is that, it shows some cut of sections of menus to the left. This is probably due to my 3440 x 1440 screen. However, all of the important menu functions are there and it does not affect the game once you are in playing. Those with 1080p resolutions won't see this anomaly.

Well worth the price.

. **The game is available for purchase now:**

The game is available for purchase now thank you for your patience!. **Update 0.50a - Changes to unlocks:**

New update was added to the game.

### **Unlocks changes**

Big changes added to the unlock system, now instead of randomly unlocking new items after victory or defeat, you will get new currency - glory, and will be able to buy new unlocks from the store in the main menu. Right now you still are able to use all ships due to testing, but after the release they will need to be unlocked too, the same as additional game modes.

### **Melee weapon returns in limited amount**

If you guys didn't know, before an update a couple of weeks ago, there was an option to equip different melee weapons, however I felt like it was really weak option to choose, not really used by the players at all. Still, I was thinking about the way to implement it back, and now I've added a rare melee weapon - plazma sword. It deals most amount of damage in the game, so the high risk of going near the enemy is justified with huge damage it can deal.

. **New update 0.81:**

New version was just added to the game:

- I decided to unlock a couple of weapons and enrgy shield armor by default. I think this will make first playthroughs a little bit more interesting, as of right now, the selection of equipment can feel a little dry
- Armor and helmets now can have bonus stats! This was heavilty requested feature in the past, which should also make equipment more interesting
- Sniper rifle now have reduced accuracy in closer distances
- Exo-suit now increases armor by 23 instead of 20, and reduces speed by 2, instead of 1
- minigun ammo count reduced to 4 from 8

- 
- Minor bug fixes and changes
